

Jan Carlo Cardama

Philippines | [linkedin.com/in/jan-carlo-cardama](https://www.linkedin.com/in/jan-carlo-cardama) | github.com/jcmcardama | jcmcardama@gmail.com

Full Stack Software Engineer with 3.5+ years of experience building and maintaining enterprise-grade web applications using React, TypeScript, Node.js, and AWS. Currently open to new opportunities.

TECHNICAL SKILLS

- **Frontend:** ReactJS, Typescript, Javascript, HTML, CSS, MUI, SCSS, Redux Toolkit, Jest, RTL
- **Backend:** Nodejs, Ruby on Rails, PostgreSQL, MySQL, REST (Postman/Swagger), C++, Matlab, MIPS
- **DevOps & Tools:** Docker, AWS, CI/CD (Jenkins), Github, Git, AI Coding

PROFESSIONAL EXPERIENCE

HCL Technologies | Pasig

Software Engineer II

Nov 2022 - Present

- Resolved 13 critical defects and shipped high-demand features including rich media previews and RTL support, as measured by improved product usability and customer adoption, by authoring comprehensive migration guides and external documentation for major product releases.
- Delivered 44+ tickets across multiple internal product platforms in a single year, as measured by on-schedule roadmap commitments, by architecting foundational backend infrastructure — including monitoring, security, and Helm-based deployment strategies.
- Maintained zero recurring defects across 10+ resolved issues, as measured by sustained 99% line and 100% statement test coverage, by enforcing rigorous code review and automated testing standards using Jest and React Testing Library.
- Increased annual technical output to 494 contributions, as measured by GitHub commit activity, by integrating AI-assisted development tools (GitHub Copilot, Windsurf) into daily workflows and mentoring teammates on adoption.

Concentrix | Alabang & Makati

Sales II Advisor

Jul 2019 - Jan 2022

- Achieved being one of the top performers for the most of 2021 and being the top agent of the LoB during the Q4 2021.
- Managed about 30 calls a day regarding customer's concern with their vehicle or if they have concerns about GM's dealerships all around the USA

PROJECT WORK

Portfolio | Developer | [Repo](#) | [Live](#)

2026

A React with Typescript application that showcases my portfolio.

- A responsive personal portfolio application built with React and TypeScript to showcase projects, skills, and professional experience.
- Designed and styled the components of the application using MUI with SCSS.
- Integrated EmailJS to handle secure client-side form processing, processing state objects dynamically to forward user inquiries directly to email channels without a backend server.

Inventory Server Backend | Developer | [Repo](#) | [Live](#)

2026

A Node.js with Express API for managing and tracking inventory.

- Built a RESTful API with Node.js, Express 5, TypeScript, and Prisma 7 to handle product inventory tracking and user data for a frontend client application.
- Implemented dual-token (access and refresh) JWT authentication delivered via HTTP-only, SameSite cookies to protect against XSS and CSRF vulnerabilities.
- Enforced fail-fast input validation using Zod v4 schemas to sanitize and validate request payloads before reaching database services.
- Documented and tested the API using Swagger UI for interactive endpoint exploration and Jest/Supertest for unit and integration testing.

Journal App | Developer | [Repo](#)

2022

A Ruby on Rails application that helps to create a to-do list.

- Created a feature that lets the users organize their tasks through different categories using Rails Associations.
- Added task and category controllers enabling users to create and manage their own categories and tasks.
- Designed the front-end aspect of the application using Bootstrap.

AucShoes | Developer | [Repo](#)

2022

A Ruby on Rails application that helps to bid and sell shoes online.

- Integrated Devise gem to support secure user authentication such as login, registration, and user-specific permissions.
- Developed a feature for sellers to upload photos of their shoes on profile photos by utilizing Active Storage in Rails.
- Allowed new users to confirm signup through an email sent through Mailer class after account creation.
- Designed and styled the components of the application using Bootstrap CSS.

EDUCATION

Full Stack Web Development, *Avion School*

2022

B.S. in Electronics Communication Engineer (Undergraduate), *University of the Philippines Diliman*

2019
